

# Assembly Instructions for 8U Goals (6'6"x12')

Goal contains 14 parts

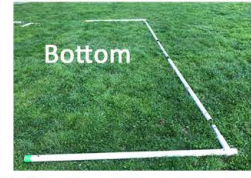

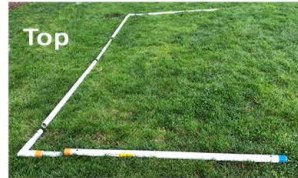

- 4 straight crossbars (2 top, 2 bottom)
- 2 short crossbar connectors (1 top, 1 bottom) with pushbuttons on both sides
- 2 top corner connectors
- 2 sidebars
- 2 bottom corner connectors
- 2 bottom side basebars with attached corners.

Plus

- 4 stakes
- 2 corner flags

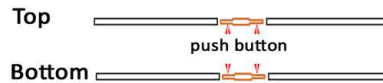

First layout all pieces on the ground. Layout top crossbar parts -2 straight and 1 connector. Then bottom crossbar -2 straight and 1 connector. Then add the sides and corner parts.

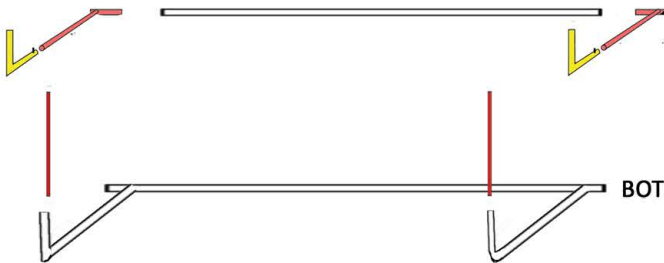

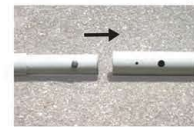

Bottom base bar has bolted preattached corner

Connect the top 3 crossbar parts by pushing the button and sliding the other piece in. Repeat this for the bottom.

**DO NOT hammer the pieces in place.**  
**Mallets are for stakes.**

Push-button assembly

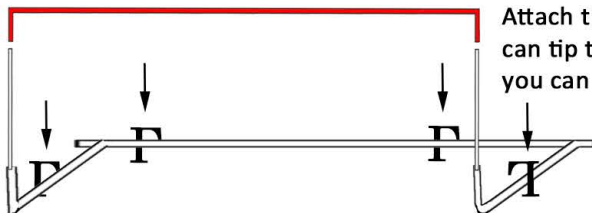

**BOTTOM:** Connect the 2 bottom side base bars to the bottom crossbar. Then connect the 2 corner connectors which will point up. (Note: The bottom corner connectors have a push buttons that face up. Top corner connectors are on the side)

**BOTTOM:** Connect the side bars to the bottom base.

**TOP:** Attach the top corners to the top cross bar

Attach the top cross bar to the rest of the base. (You can tip the base over to lay it flat on the ground so you can connect the top bar.)

Attach the net starting from the top and tuck net under and around bottom crossbar to keep balls in the goal. Stake the bottom of the goal to the ground. Zip up goal bag and lay it across the back or the net. This helps keep balls from rolling out.
